Subject: Stonewall Access

Mr. French,
Here are the four remaining addresses where we have not obtained access agreements in the Stone Wall Subdivision.

 Settlers Landing Ct
 Settlers Landing Ct
(b)  Trail Blazer Trail
 Hidden Trail Ct

If property owners of these addresses would like their well sampled, have them send me a email with the request and include there cell phone number, name, address and whether or not they have a filter and what kind of filter.

Thanks,
Ken

Good Evening Mr. French,

I am the EPA Community Involvement Coordinator that will be working with the community and the On-Scene Coordinator, Ken Rhames, on the Stony Hill project related to the wells in the area. Today, flyers were distributed to the Stonewall Neighborhood; however, it rained during much of my efforts and I am sure most of the flyers were drenched.

I have attached the flyer for your information and the information of others that you think should attend. It is hoped that you have an e-mail distribution list to send the flyer via e-mail to the HOA. Thanks in advance for your assistance and I look forward to meeting you on August 14th, 2012.

Thanks,
Tonya Spencer

Rhame,

We received the email below from the Stonefield's in our neighborhood concerning their contaminated well water due to the "Team Electric" building on Stony Hill road.
We would like to have our water tested as well.

Address:

Bo and Abigail French
[REDACTED] Settlers Landing Ct.
Wake Forest, NC 27587
My cell is [REDACTED]

Please let us know how quickly this can be done.
Thank you so much!

Best Regards,

Abigail French

Subject: Re: Stony Hill well water

This might be a good time to approach the city about bringing in city water to the entire subdivision. I know that we would love to have that done. I am sure that the ground water on our lot beside you is probably contaminated if yours is. Have any of the others on your cul de sac had testing done???

On Jul 24, 2012, at 11:06 PM, Monica Stonefield wrote:

Dear Neighbors,

Last week we were contacted by the EPA and asked if our water could be tested following an investigation of a contaminated well on Stony Hill Road. After sampling of our well, we were informed that it is contaminated with a chemical solvent called TCE or trichloroethylene. This chemical is a carcinogen, and we have been asked to limit our use of water as much as possible (including showering/bathing) until remediation can take place. Fortunately, the concentration of TCE in our water was low but still met the threshold required for action to occur. Today I was informed by the State Department of Health and Human Services that the source of the contamination is from the "Team Electric" building on Stony Hill Road near the entrance to Hasentree. The state has arranged for bottled water to be delivered to our home and are currently reviewing the options for a solution. They have mentioned the possibility of adding a carbon filter to our existing filtration system or bringing in water from the city or even Hasentree. Mark and I felt as though we should alert everyone to the situation so that steps could be taken to ensure that we all have safe water. I have listed the contact information for the gentleman that is involved with the investigation through the EPA and would urge you to contact him to ask that your water be tested as well. If you have any questions, please feel free to reach out to Mark or myself...we are trying to gather as much information as possible every day.

No, I have a proposal I would like to run by both of you.
Basically if EPA extends a AQUA line from further away to increase capacity would the home owners agree to connect themselves? EPA would still connect those that are at 5 or above.

I'm assuming your test would detect all chemicals (not knowing if all chemicals are volatile or not)?
Also, Is there a water approved sampling container that you can drop off with a suggestion on what else we should test for? This is a strong chemical smell. I'd like to be here so the water in the house can be smelled as well. Let me know if you have an idea on when Andrew might be here or if you can call on your way so I can make sure I'm here.

>> Ken,

>> The gasoline/petroleum smell (not sulfur, rotten egg smell) is so strong now that we couldn't shower for church or wash clothes. I understand this is different than the TCE issue. I wanted to ask if some could stop by in the morning to smell and then test the water. It's clearly a chemical smell that we've never had before but we will not be using or drinking our water until its tested. If you guys won't test, please let me know ASAP.
